

WHITEPAPER

# ABOUT APTOS

Aptos is a new type of blockchain that takes advantage of the specialist language Move and its formal contract verification (the Move Prover) to offer unprecedented levels of scalability and speed.

Aptos offers tangible improvements thanks to its concurrent processes as transactions are pipelined to the public ledger.

Aptoge aims to be foster the meme-loving community that grows within the Aptos chain. As the

Aptos blockchain continues to chart new levels of use, Aptoge will grow alongside it, adding brand and community value at every level. In addition, we are committed to bringing a range of new DeFi utilities to Aptos that are widely enjoyed on EVM chains.

# OUR TEAM

Aptoge is backed by a dedicated team of professionals including a core team that have advised multiple tokens to multimillion market-caps. Our core team spans timezones to run our communities 24/7.

Our developers were some of the earliest to release an Aptos token and we continue to work alongside representatives and contacts from the Aptos team to improve our on-chain offering.

For our new NFT usecase, as well as our growing alternative communities (with Discord being added to Telegram in the coming days), our team is constantly onboarded recommended members to increase our throughput.

# OUR MISSION AND PROGRESS SO FAR

Aptoge aims to be the number one stop for DeFi on the Aptos chain, bringing a meme-loving community and DeFi utilities that investors know and love on other chains. Hence, looking to the future, the Aptoge team are doubling down on bringing DeFi investors on other chains to Aptoge and towards Aptos in general, through educational material and presence on targeted platforms.

Already, we have released the following:

- The first buy-bot on the chain (now configurable to scale with the buy size!)
- The first price-bot on the chain (with some of the best charting software accross chains)
- Listed on CoinGecko, CoinMarketCap and [Crypto.com](http://Crypto.com) and tweets and posts by top telegram influencers
- Release of our liquidity locker - the cheapest on the chain so far - and lock for 1 year on there

# HOW TO BUY

1. Buy APTOS on CEXs that support it.
2. Send your APTOS to your Aptos Wallet
3. BUY Aptoge on liquidswap and hippo swap
